Vulnerability Report

Report generated on 14 July 2021 at 00:59:39

1. Introduction

The identification of vulnerabilities has been performed using cve-bin-tool version 2.2

The report has been generated by merging multiple intermediate reports.

2. Intermediate Reports

The following table contains severity levels count of individual intermediate report sorted on the basis of timestamp.

Timestamp	Tag	Total Files	Products with CVE	Products without CVE	UNKNOWN	LOW	MEDIUM	HIGH	CRITICAL
